

NOTES

Play: Can you find.....?

Materials:

3 x 10 Number Array Cards made in class

Spinner

(Numbers, Greater Than/Less Than, or 1 more, 2 Less..)

Directions:

This is designed as a partner activity but can be adapted to a small group.

1. Spread numeral and array cards on the ground facing up.
2. Player A rolls the die (or spinner).
3. Player A finds the match of the die or spinner to a card that represents the same number.
4. Player B repeats steps 2-3.
5. Players continue game taking turns.

Variations:

- Modify the game by adding the spinner that has more than, less than, 2 less, 2 more, etc.
- After making an initial match by playing the original version of the game, use the second spinner (1 more, 2 less..) to find a second Number Array Cards that fits the rule on the spinner.
