### Play: Domino Memory

Materials:  
Dominoes

#### Directions:

Using Dominoes, play the classic game of Memory or Concentration.

Play in pairs or small groups.

1. Place dominoes face up and match different presentations of the same number.
2. Mix cards and arrange in a 4 by 4 array faced down.
3. Player A turns two dominoes over looking for a match.
4. If the match is made, Player A collects and displays the pair and records the two number bonds.
5. If no match is made, the dominoes are returned to their original placement hiding the number.
6. Player B takes a turn in the same manner.
7. Players continue game taking turns.
